TURMION® REMOTE CONTROLS

PRODUCT INFORMATION

- The Turmion® System is ideal for easy automation of your plug in appliances, from wherever and whenever you want to control them.
- Turmion® allows you to remotely turn on and off any electrical appliance with the hand held remote or smart device around your swimming pool, spa, home and backyard from a distance.
- You can create multiple programmed sequences to power devices on and off automatically.
- Any device with a 10 amp power point (or optional 15 amp) can be stopped and started automatically.
- All units are weatherproof, wall mountable and Australian made ISO 9001.

TURMION®

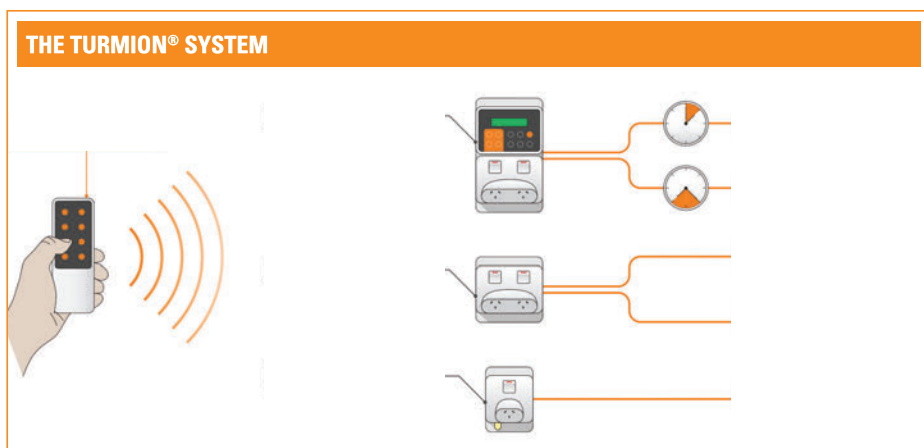

- The Turmion® Link Control Unit and remote allows you to remotely control two 10 amp power points at a single location. With the Master Control System you can preset them to come on and off as many times a day as you wish.

TURMION® PRO

- The Turmion® Pro System is available with WiFi connectivity. This system can be operated from your mobile phone with the app and includes the ability to set up timing as well as scene control.

TURMION® PRO WiFi TXF TRANSFORMER

- The Turmion® Pro WiFi TXF Transformer lets you do it all from your mobile phone – switch lights on and off, change colours, set scenes and create timers. Using the app you can schedule your pool lights to turn on at specific times. With the Turmion® Pro WiFi TXF2 you can control two lights and set individual timers for each.
