poolware TOP-MOUNT SAND FILTER

NOTICE: The pressure gauge will indicate the build-up of dirt in the filter. At the start of the filtration cycle, there is usually a pressure drop between all filters through the filter. This is normal. The pressure in the filter will increase if the filter is dirty. A pressure drop of 0.5 bar or more is an indication that the filter is dirty and should be cleaned. The pressure in the filter will increase if the filter is dirty.

WARNING: Do not use the filter for anything other than filtration. Do not use the filter for anything other than filtration. Do not use the filter for anything other than filtration.
